

The Atmosphere

Read the sentences and fill in the gaps with words from the box.

**hottest gases weather coldest thermosphere carbon dioxide
highest five nitrogen oxygen mesosphere lowest ultraviolet**

- 1 The atmosphere is the layer of _____ that surrounds the Earth.
- 2 The atmosphere is composed of _____, oxygen and other gases.
- 3 The atmosphere contains the _____ we need to breathe.
- 4 Plants use _____ from the air for photosynthesis.
- 5 Earth's atmosphere has _____ main layers.
- 6 The troposphere is the _____ layer from the Earth.
- 7 The troposphere is where the _____ occurs.
- 8 The Ozone layer in the stratosphere, filters _____ radiation.
- 9 The top of the mesosphere is the _____ place in the Earth system.
- 10 Meteors and space junk burn up in the _____
- 11 Ultraviolet radiation makes the thermosphere the _____ layer.
- 12 Aurora and satellites are found in the _____
- 13 The exosphere is the _____ layer of the atmosphere.

The Atmosphere

Read the sentences and fill in the gaps with words from the box.

hottest gases weather coldest thermosphere carbon dioxide
highest five nitrogen oxygen mesosphere lowest ultraviolet

- 1 The atmosphere is the layer of gases that surrounds the Earth.
- 2 The atmosphere is composed of nitrogen, oxygen and other gases.
- 3 The atmosphere contains the oxygen we need to breathe.
- 4 Plants use carbon dioxide from the air for photosynthesis.
- 5 Earth's atmosphere has five main layers.
- 6 The troposphere is the lowest layer from the Earth.
- 7 The troposphere is where the weather occurs.
- 8 The Ozone layer in the stratosphere, filters ultraviolet radiation.
- 9 The top of the mesosphere is the coldest place in the Earth system.
- 10 Meteors and space junk burn up in the mesosphere
- 11 Ultraviolet radiation makes the thermosphere the hottest layer.
- 12 Aurora and satellites are found in the thermosphere
- 13 The exosphere is the highest layer of the atmosphere.
